# BONAFIDE CERTIFICATE

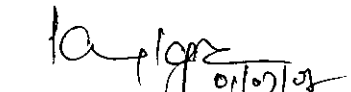

This is to certify that this project report titled **Patni COE Portal** is the bonafide work of **Ms S.Hema Priya** (Registration Number: **71205621013**) who carried out the project under my supervision. Certified further, that to the best of my knowledge the work reported here in does not form part of any other project report or dissertation on the basis of which a degree or award was conferred on an earlier occasion on this or any other candidate.

## To whomsoever it may concern

This is to certify that Ms. Hema Priya Subramaniam as partial fulfillment of her MCA, from Kumaraguru College Of Technology, has completed her project for Patni under the guidance of Mrs. Tejashri Kundale. She has worked on "Patni COE Portal". The project traineeship duration has been from 24/12/2007 to 2/5/2008.

Hema Priya has been very sincere & diligent in her job and her performance on the project has been acceptable.

We wish her a bright career and success in all his future endeavors.

For Patni Computer Systems Ltd.

Pradnya Naidu  
Asst. Manager - GRiTHR

## ABSTRACT

Patni COE Portal is an intranet portal developed as a user friendly application with asp.net as front end and sql server as database server. This portal is developed for knowledge sharing among employees of finance business unit in patni

The main objective of the portal is to provide knowledge share by maintaining communication and tracking details in FSBU. The COE portal is used to upload the employee details into the portal and the employees can search any type of documents

Communications are maintained with time, place, and date, description regarding the meeting or any type of information for finance business unit. All communication details are listed in the portal. Employee resource Skills are maintained for project allocation and a project pipeline is maintained to find out the past and existing projects.

Employee details such as an administrator, internal user, and Business Delivery officer details can be tracked, projects details can be tracked to find out the starting and completion of the projects, awards and recognition for the employee can also be tracked.

Finally this portal helps to track the whole details of the finance business unit as any type of documents can be uploaded and tracked

# ACKNOWLEDGEMENT

I express my grateful thanks to our beloved principal, **Dr. Joseph V Thanikal Ph.D.**, Kumaraguru College of Technology, Coimbatore, for giving me an opportunity to take up this project.

I express my deep sense of gratitude to **Dr.M.Gururajan Ph.D.**, Professor and Head, Department of computer Applications for extending the help in providing all the facilities for the successful completion of the project

I wish to thank **Mr. A.Muthu Kumar M.Sc, M.C.A, M. Phil**, Assistant Professor and Course Coordinator, Department of Computer Applications for providing his valuable suggestions and encouragement through out my project

I would like to express my sincere gratitude to **Mr.C. Rajan Krupa M.C.A.**, Senior Lecturer, Department of Computer applications for his guidance, support, cooperation and valuable suggestions during the course of the project

I also thank **Mrs. Tejashri Kundale**, Project Manager, Patni Computer Systems Limited for giving me an opportunity to work on this project and improving the visual layout and performance of this project.

Finally, I would like to thank my parents and my colleagues who helped and supported me to complete this project

## List of Symbols and Abbreviations

The abbreviations and symbol used for this project are as follows:

- ✓ COE- Center of Excellence
- ✓ FSBU- Finance Business Unit
- ✓ SQL- Structured Query Language
- ✓ RAM-Random Access Memory
- ✓ ASP-Active Server Pages
- ✓ OLEDB- Object Linking Embedded Database
- ✓ CMM-Capability Maturity Model
- ✓ SEI-Software Engineering Institute
- ✓ Dr-Document Rating

# CHAPTER 1

## INTRODUCTION

### 1.1 Organization Profile

Patni Computer Systems Ltd is one of the leading global providers of Information Technology services and business solutions. Over 15,000 professionals service clients across diverse industries, from 22 sales offices across the Americas, Europe and Asia-Pacific, and 20 Global Delivery Centers in strategic locations across the world. We have serviced more than 400 FORTUNE 1000 companies, for over two decades

#### **Vision**

To achieve global IT services leadership in providing value-added high quality IT solutions to our clients in selected horizontal and vertical segments, by combining technology skills, domain expertise, process focus and a commitment to long-term client relationships.

#### **Innovation and Excellence in Execution**

Patni delivers high quality, reliable and cost-effective IT services to customers globally. We provide world-class technology services by constantly exploring and implementing innovative solutions that drive long-term value to our customers

Patni is an ISO 9001:2000 certified Organization; assessed enterprise-wide at SEI-CMMI Level 5 (V1.2), SEI-CMM Level 5 .We have integrated Six Sigma techniques to focus on continuous, measurable process improvement, with powerful analytical tools and sophisticated review processes.

## 1.2 Problem Definition

The purpose of this portal is to overcome the challenges faced by the existing portal among the FSBU. The existing portal was not able to find out the whole details of FSBU.

The problem is to maintain the past and the existing information to maintain a communication for easy allocation of the projects. The challenges faced are:

- Lack of knowledge sharing among the employees
- No proper communication maintained in case of any meeting
- lack of time to allocate the projects for the employees
- Pipeline was not maintained to find out the past projects
- The project and employee details were not able to track out easily.

These problems made the existing feature to increase the features for the easy access among the employees. The new COE portal helps to overcome the challenges of the existing portal.

The existing feature has to overcome the challenges maintained to provide a good feature and easy handling for the users among the FSBU. The goals of this project is to increase the features of the existing portal

1. To maintain documents of separate searching and uploading into the portal
2. The searching can be made with a single keyword or with an advance searching  
By giving the category and the subcategory of the documents
3. Any contributor can upload the document and the administrator can validate
4. Communication description is to be maintained where the employees can easily  
Identify the date, time, and place of the meeting held.
5. A pipeline has to be maintained to find out the number of projects existing and  
Completed, and the days required to complete the given project
6. Employee Skills can be used to allocate the projects according to the skills
7. History tracker can be maintained to track out the details easily

These goals help to maintain an easy identification of any documents and the maintenance of the details helps for the resource center to be maintained. The center of Excellence helps to provide any type of the documents maintained in the finance business unit

From the number of projects received, FSBU maintains the resource and allocates according to the skills. This enables the easy allocation and the maintenance of the project

This portal helps to find out the details easily and it helps to track out the employee, project, and the user details for this portal. The COE ensures to deliver the FSBU information.

# CHAPTER -2

## SYSTEM ANALYSIS

### 2.1 Existing System Architecture

The Existing system is the system where only certain information was maintained. The existing system included:

- Number of employees list is maintained.
- Number of projects for the FSBU is maintained
- There is a lack of knowledge sharing across the portal
- Communication is not maintained to share within the employees
- A project pipeline is not maintained to find out the number of existing and the completed project

This existing portal was only to maintain the employee details and the projects done, The New COE portal is enabled to overcome these problems to maintain the complete record of the employee, projects, share communication among the employees.

### 2.2 Proposed System Architecture

The COE portal enables the users of the system to share the knowledge among the FSBU.

#### *Knowledge Sharing and Maintaining Communication*

This portal makes the users of the system to find out the complete details of the employees, numbers of persons allocated to a particular project, starting and ending of the projects, time taken to complete the project, from the projects received for the FSBU, the employee is allocated to the project with their resource skill

## **2.3 User Interface Requirements**

The business Requirements are categorized into the following modules

### **Module 1: PATNI SECTION**

This module provides descriptive information of Finance Business Unit. It is classified into following sub-modules.

- I. Introduction to patni
- II. Introduction on past projects
- III. Maintain patni information

#### **I-Introduction to Patni**

This portal gives an introduction of Patni, where it manages various business units under different projects. This module describes about FSBU and its projects

#### **II-Information on Past Projects**

The project details can be viewed under this module, it states the starting date, ending date to view the past projects. It displays the whole details of the project as

- Number of users involved in completing the project
- Number of days, months for completing the project
- It displays the project as rejected or accepted

#### **III-Maintain Patni Information**

The portal information are created in this module with the Name, description, type and status as either active or inactive .The information created is stored in the database to view from the portal, the information can be modified for any changes or can be deleted

## Module 2: KNOWLEDGE MANAGEMENT

This module enables the users to share the knowledge among FSBU users. This module is used for searching and uploading the documents. It is classified into

- I. Document Search
- II. Document Upload

### I-Document Search

All the documents are uploaded into the portal; it can be accessed by other users. In order to search any document, a keyword can be given to search the document; the documents with the specified keyword will be displayed

The documents can be searched with the help of advanced searching by giving author name, content name, category, and subcategory. The documents can also be searched using the uploaded date

#### *Keyword Searching*

<b>Keyword</b>	<i>FUND</i>
----------------	-------------

#### *Documents found during search*

Mutual Fund	What is mutual fund.....?	C:\inetpub\wwwroot\
Fund	Funds can be classified.....	C:\inetpub\www.....

### II-Document Upload

The documents are uploaded into the portal to share among the users. The contributors can add their details into the portal giving name, e-mail, and phone no. The content details such as document name, format, version and category are also uploaded to search any type of the documents.

### Module 3: COMMUNICATION CENTER

The portal maintains communication among the users. The communication is done by giving the subject, description, details of the communication and the date is automatically updated. The communicational description is given by the administrator.

#### Communication Details

Communication Subject	Patni COE Portal
Communication Description	Shares the knowledge among the users through portal
Details of communication	Meeting, Announcements
Communication Date	05/24/08
Update date	Changes made when updated

Information are uploaded into the portal by the administrator, the dates are uploaded automatically. The communication can be classified into

#### I-View Communication

#### I- View Communication

The communication uploaded into the portal is viewed by the users. Any type of meetings or announcements can be viewed. The communication made can also be updated for late meeting or announcement

#### View Communication

Communication Subject	Communication Details	Date
Patni COE Portal	Meeting, Announcements	05/24/08

## **Module 4: RESOURCE CENTER**

According to the skill set of the employee, projects are allocated, the project describes with the starting and completing date of the project. Numbers of resources are entered as how many employees are needed to complete the particular project

All the details are uploaded into the portal by the administrator; the details can be updated and modified by the administrator

Project pipeline displays the number of completed projects, existing projects, and the time taken to complete the projects. All the existing and the completed projects are listed.

## **Module 5: HISTORY TRACKER**

All the details of the employees, type of users such as administrator, internal user and the number of projects are tracked. It displays the name of the user with the projects completed

### *Tracker Report*

Name of the user	S. Hema Priya
Type of the user	Administrator
Projects completed	8
Experience	4 years

The portal is used to track the details; the portal updates all the information as the COE displays any type of information

# CHAPTER 3

## DEVELOPMENT ENVIRONMENT

### 3.1 Hardware Environment

The hardware support required for deploying the application

#### Server Configuration

Processor Speed Minimum	: Intel Centrino Duo Core 2.0 GHz or Higher
RAM	: 2 GB
Hard Disk	: 80GB or Higher

#### Client Configuration

Processor Speed Minimum	: Intel Pentium 4 or Higher
RAM	: 512 MB
Hard disk	: 40GB or Higher

### 3.2 Software Environment

The software support required for deploying the application

Server Operating System	: Windows XP
Client Operating System	: Windows XP
Framework	: .NET Framework 3.0
Database	: MS-SQL Server 2000
Language	: Asp, vb

# CHAPTER 4

## SYSTEM DESIGN

### 4.1 Data Model

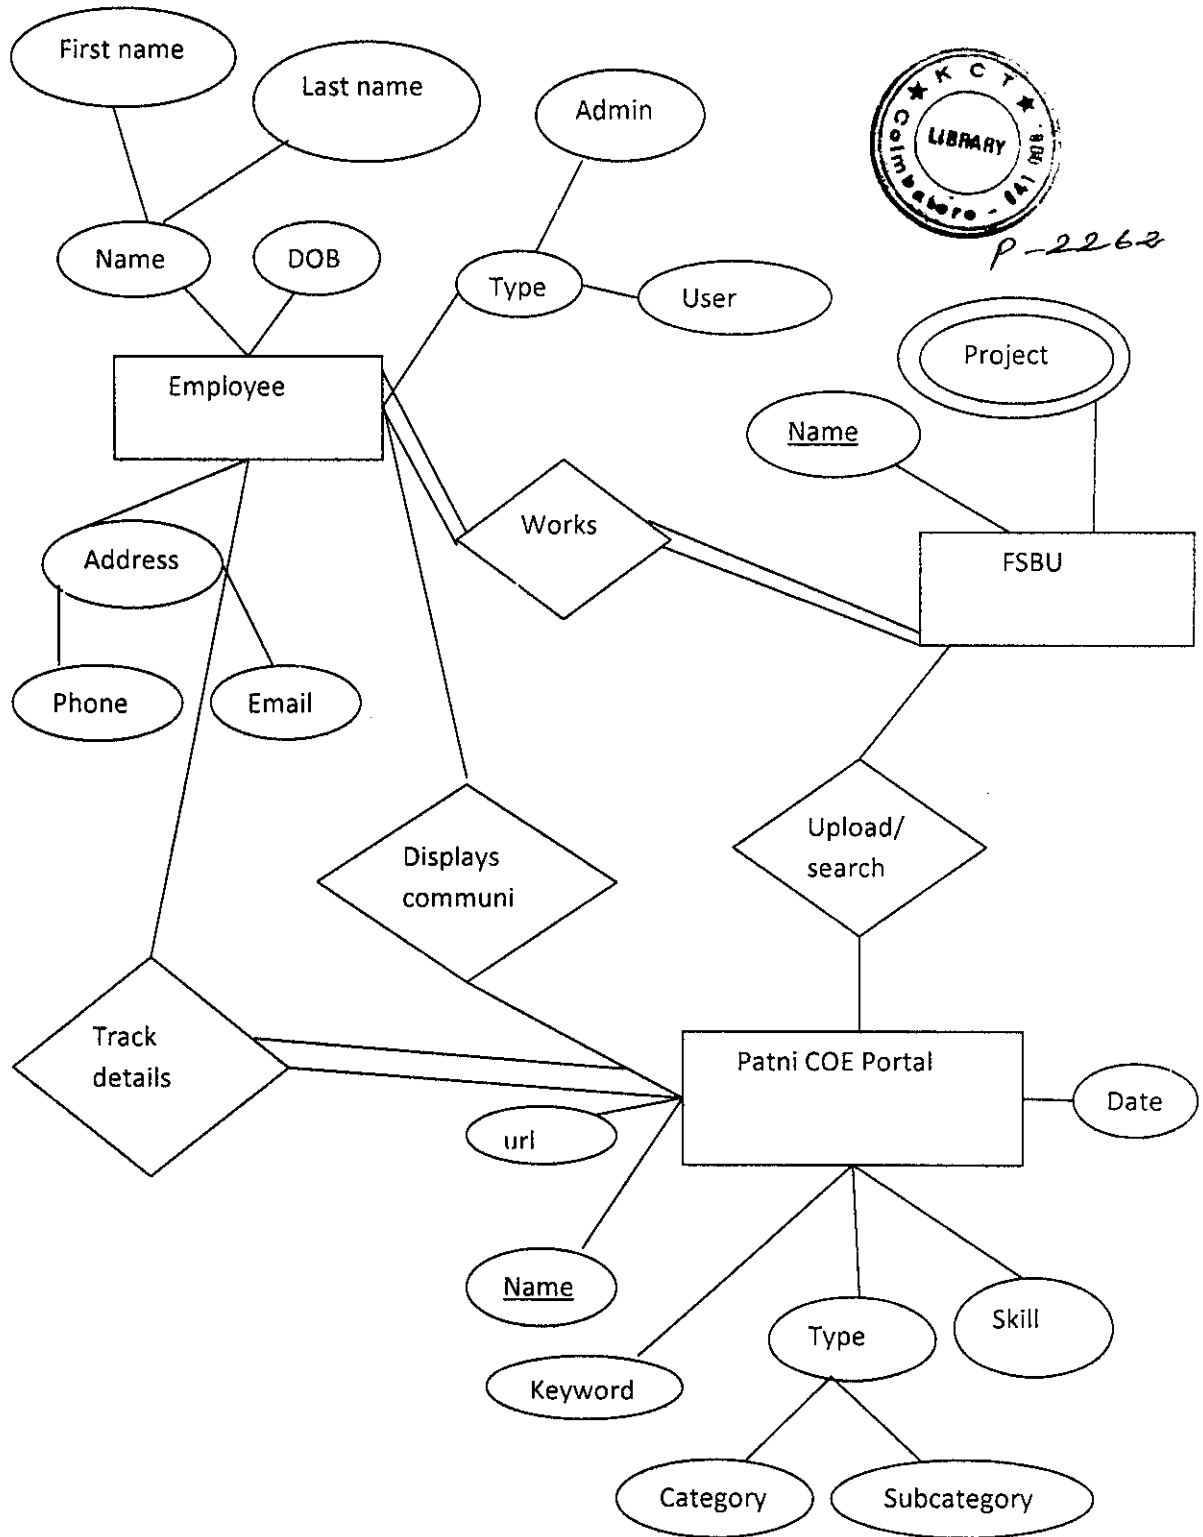

#### 4.1.1 Entity Relationship Diagram

The ER diagram describes the modules of the Patni COE Portal

It includes the following parts

- Patni section
- Knowledge Management
- Program Management
- Resource Center
- History Tracker

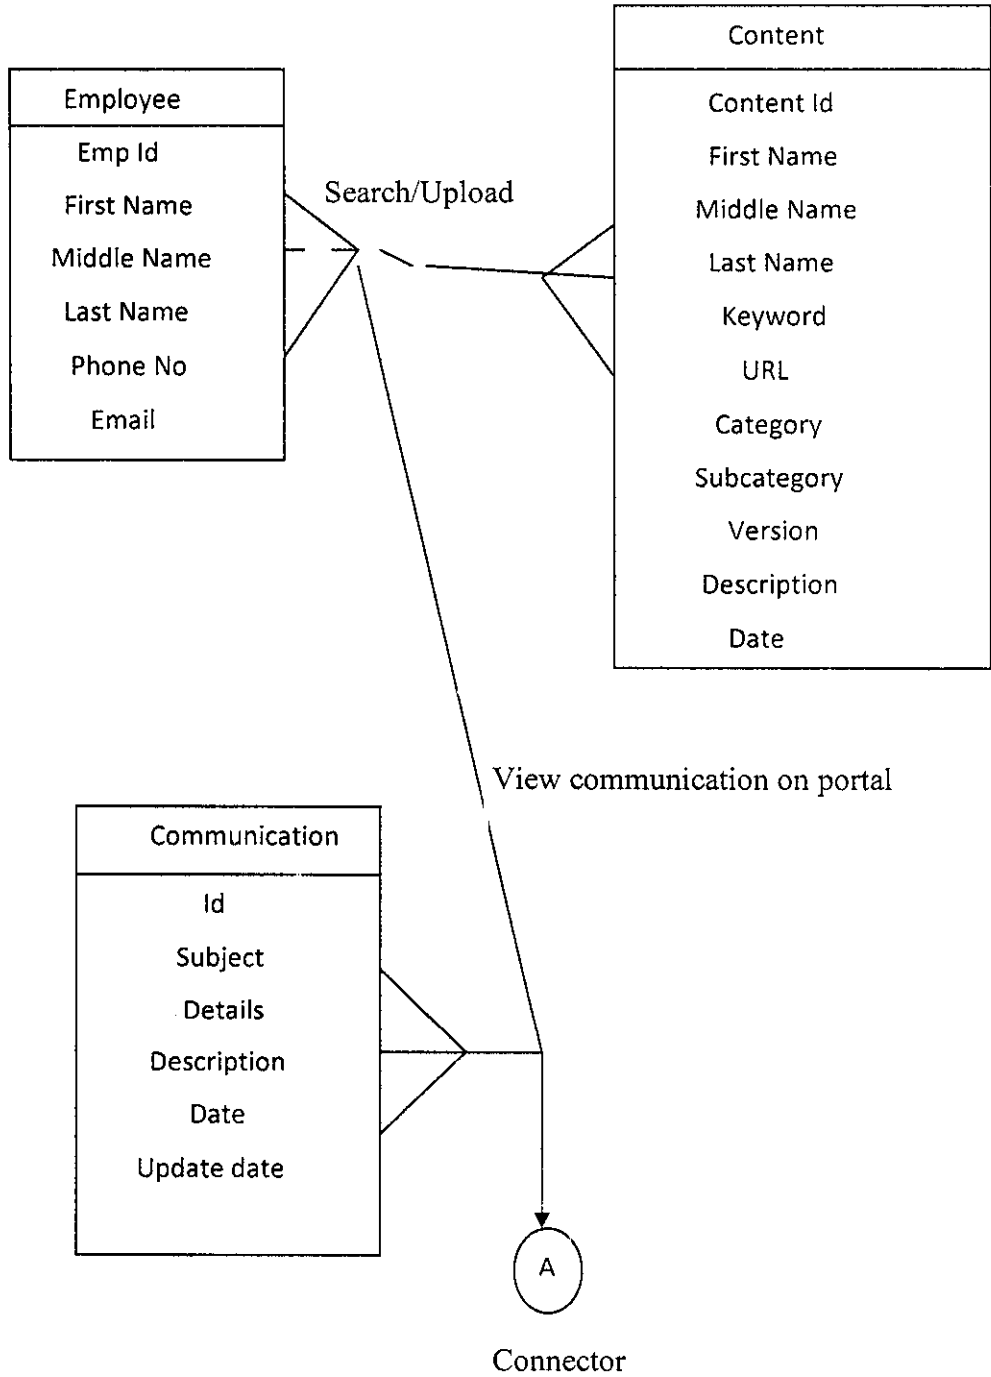

Each module describes its features with a main advantage of knowledge sharing among the users. The Entity Relationship Diagram for Patni COE Portal is shown in the following figure [fig 4.2.1.1]

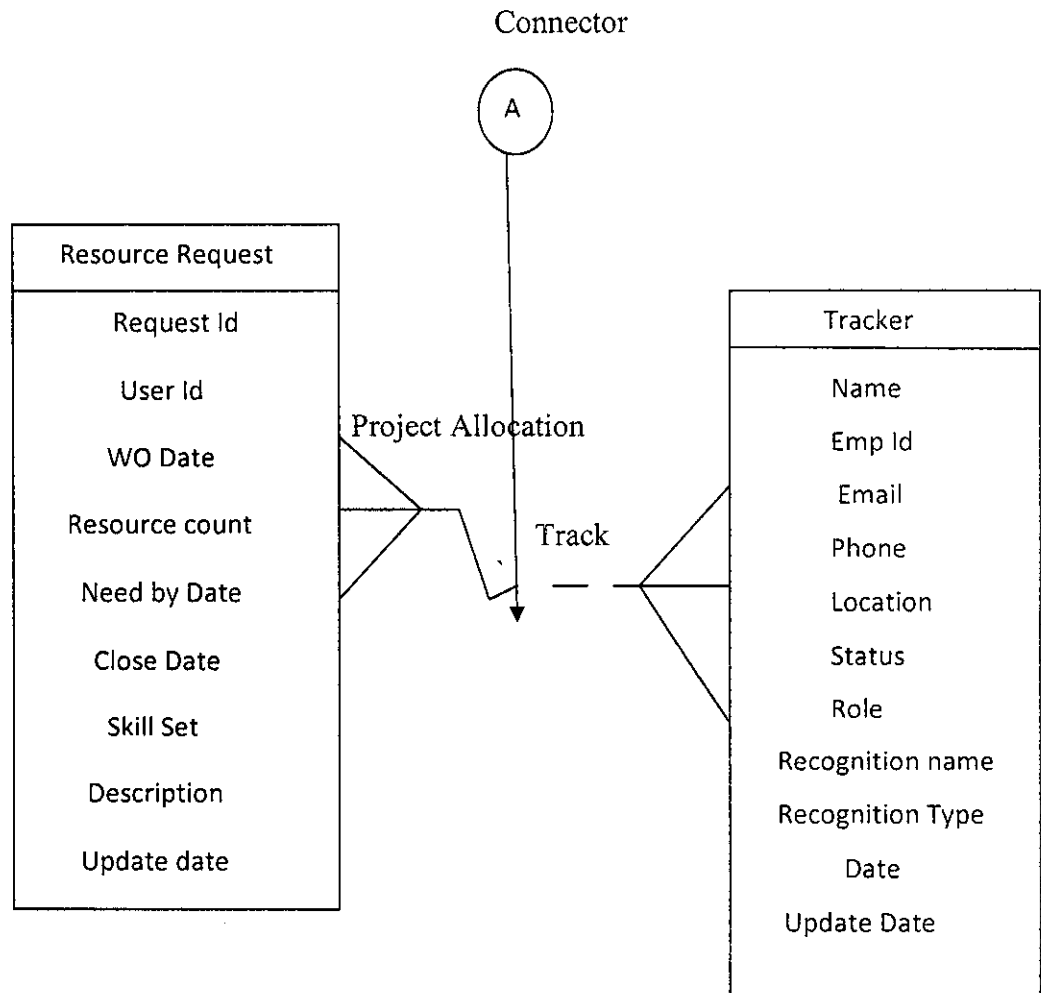

[Fig: 4.1.1.1] MAINTANANCE OF PATNI COE PORTAL

### 4.1.2 Logical Data Design

It defines the entity relationship of the portal in the following figure [fig 4.1.2.1]

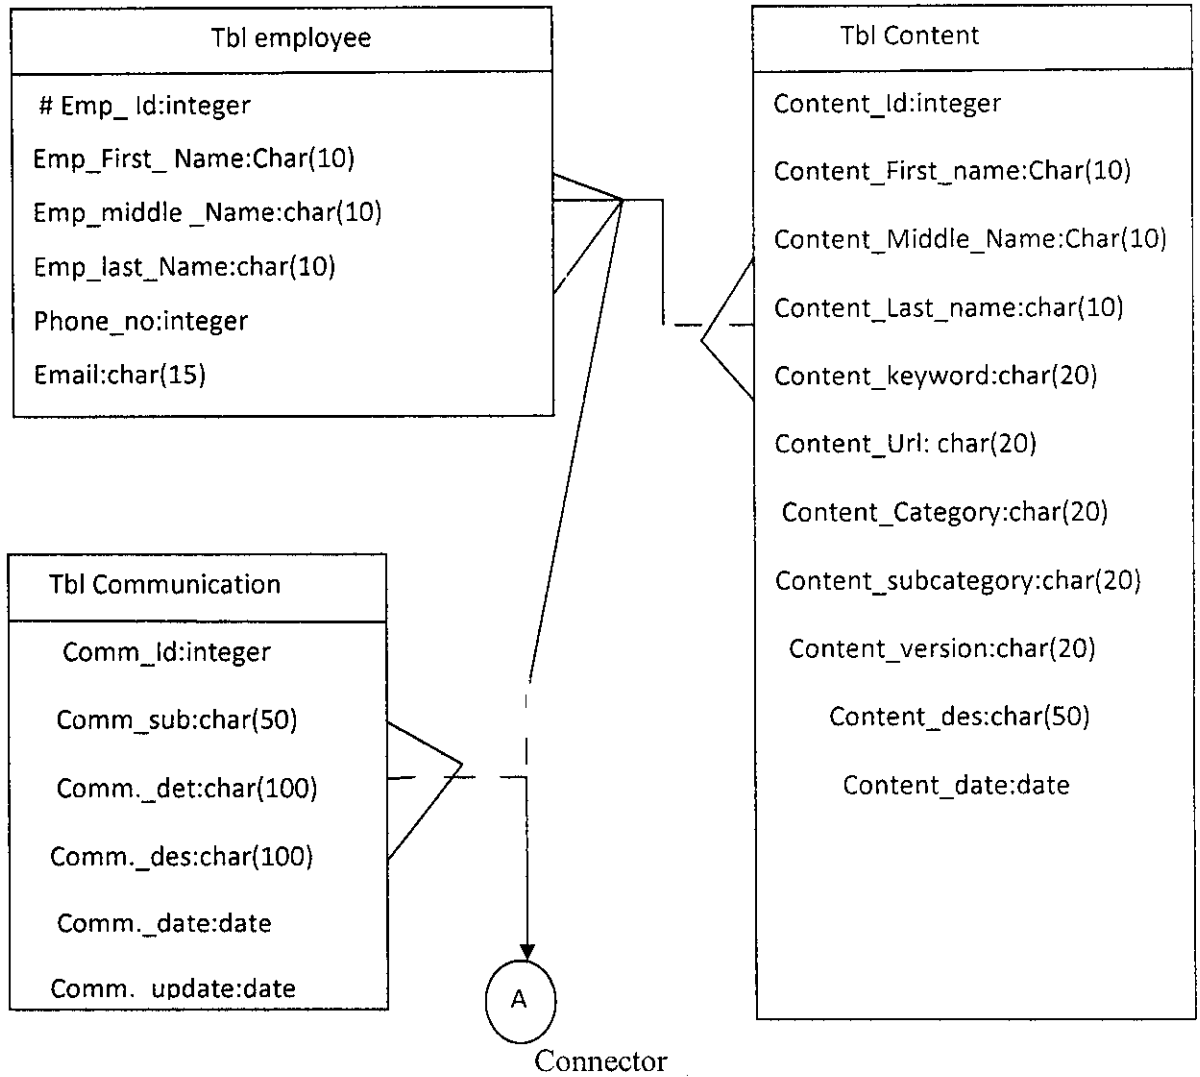

[Fig: 4.1.2.1] *Logical Data Design*

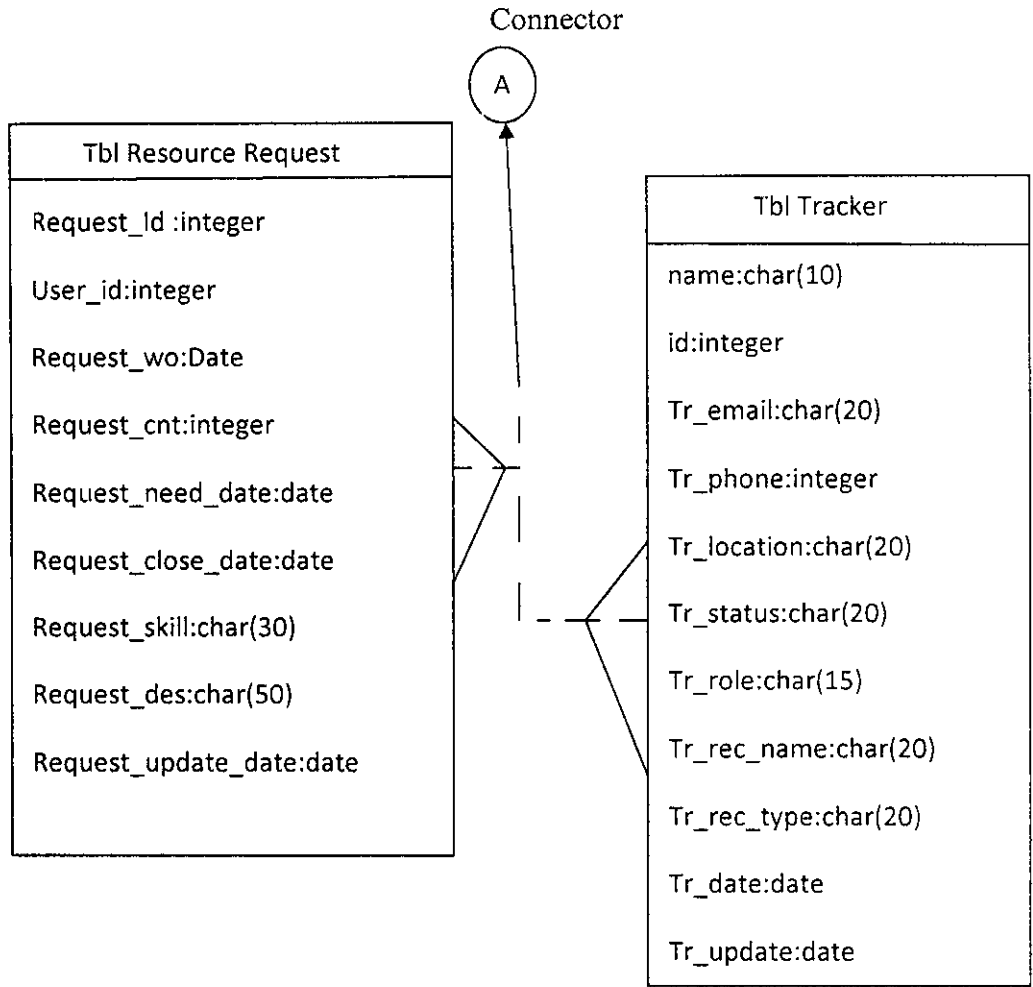

### 4.1.3 Physical Data Design

The physical model for the table describes the specification of the tables and the columns where foreign keys are used to find out the relationship between the tables. It is described in the following figure [fig 4.1.3.1]

### *Physical Design of portal*

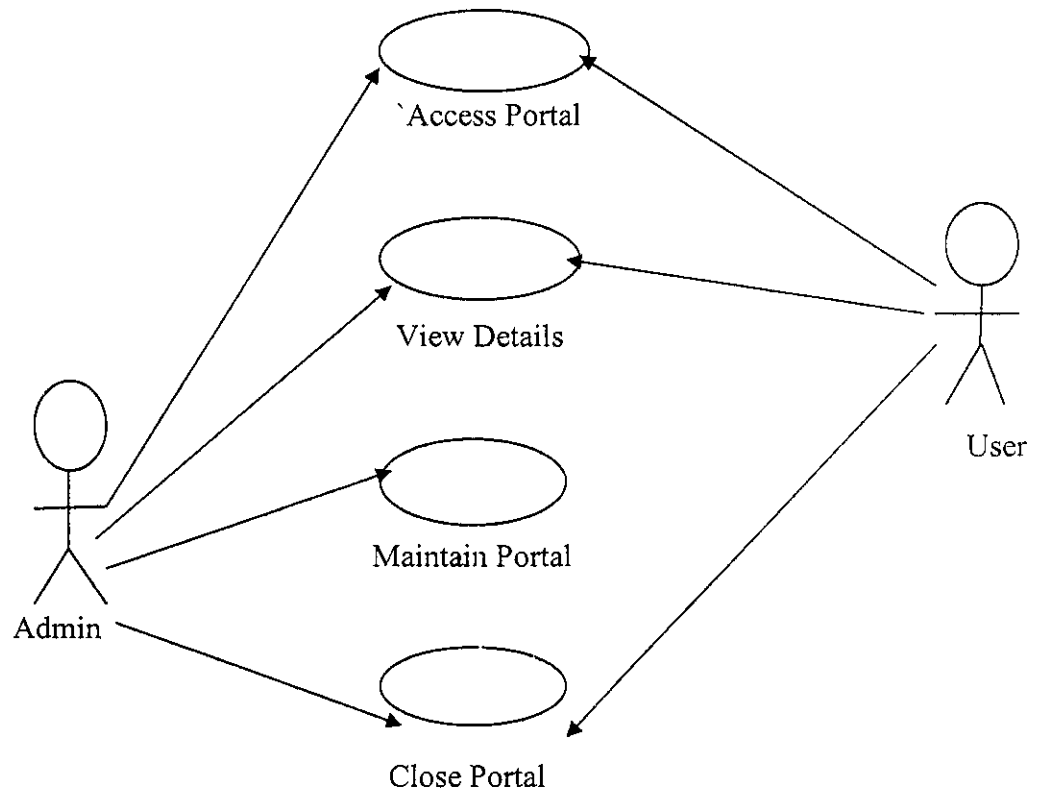

[Fig: 4.1.3.1] *Physical data design of Patni COE portal*

## 4.2 Process Model

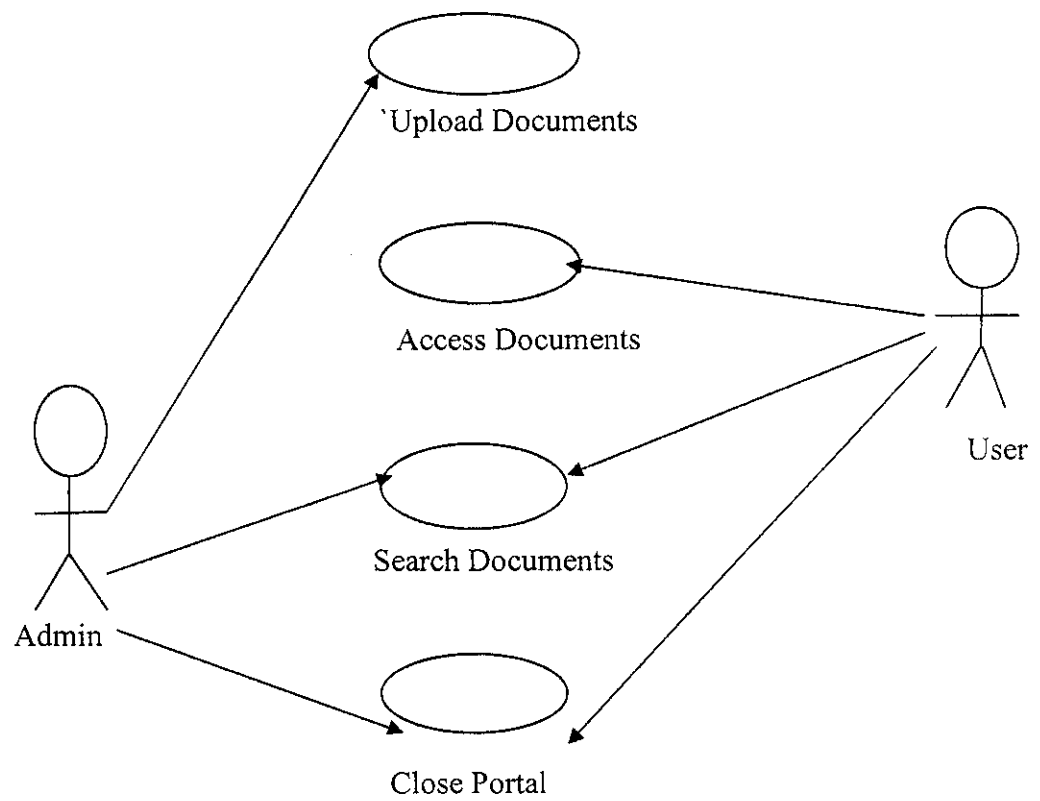

### 4.2.1 Use case Diagram

The portal is maintained by the administrator, the internal user accesses the portal. In this process, the user and the administrator view details from the portal, administrator maintains all the portal details, it is shown in the following [fig 4.2.1.1]

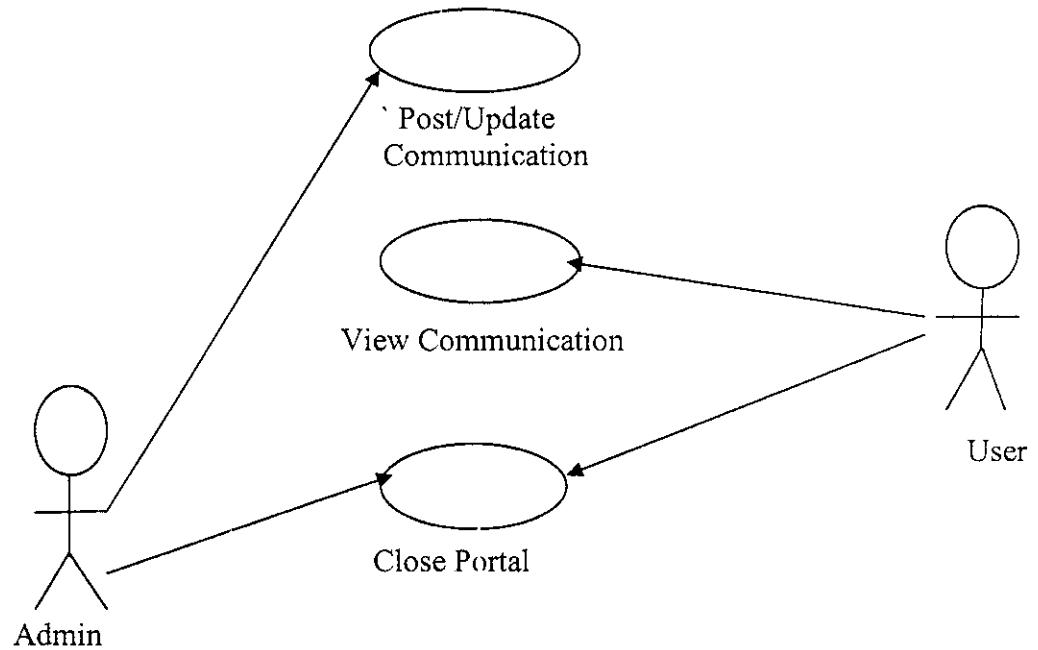

[Fig: 4.2.1.1] **Maintain portal Details**

The content details are maintained as the documents of the employees and the project details are uploaded into the portal by the administrator and the internal user can download and store the documents. This portal helps searching process as any type of documents can be searched by the users of the system. The content details are shown in the following figure [fig: 4.2.1.2]

**[Fig: 4.2.1.2] Maintain Content Details**

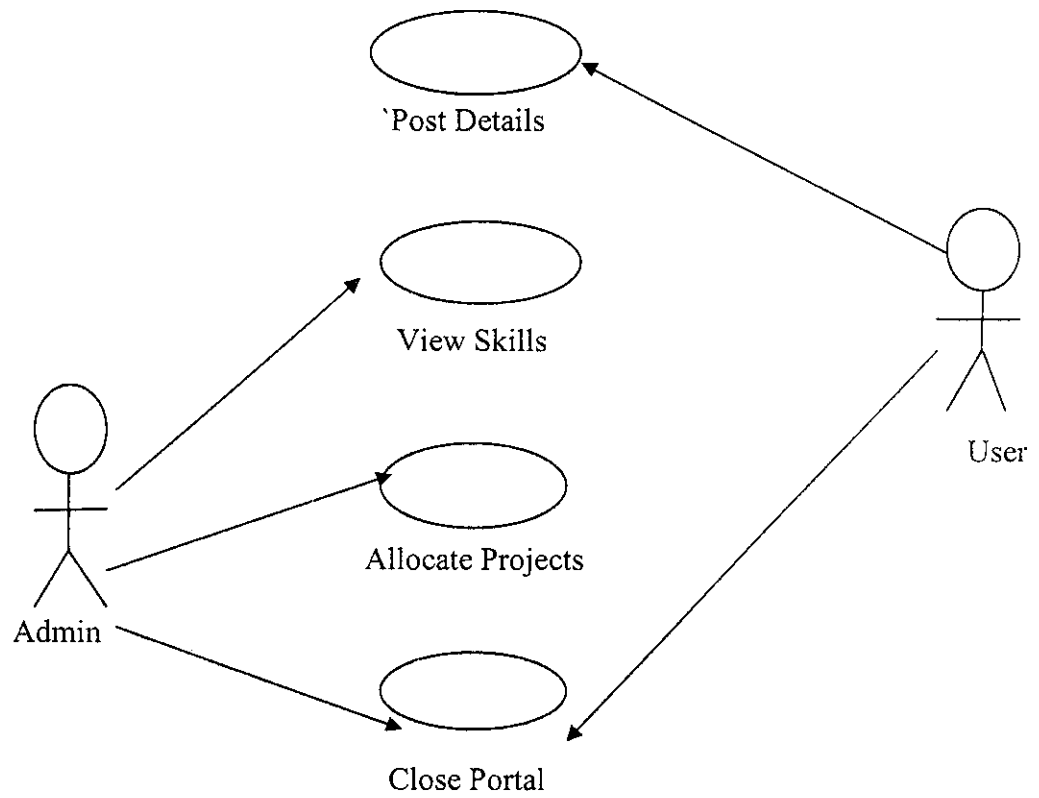

Communication details are displayed in the portal, so the user can easily view the data as it consumes time for all the users, the administrator posts any type of communication on the portal, the process for maintaining communication is shown in the following figure [fig:4.2.1.3]

**[Fig: 4.2.1.3] Maintain Communication**

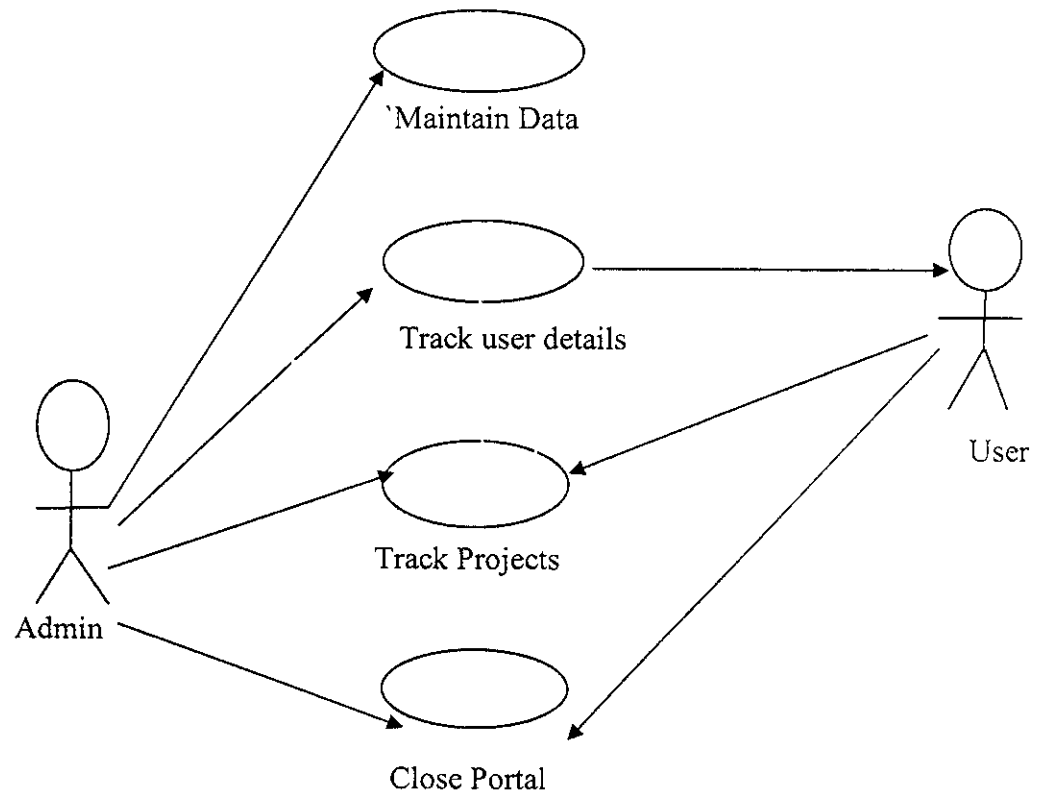

Each user closes the portal after viewing the details, the communication can also be updated for any changes, after the completion of the communication the details are deleted by the administrator

The projects for the finance business unit are stored in this intranet portal; all the details of the employees are stored in the database as the project manager will allocate the projects according to the skills of the employees, the resource request details are shown in the following figure[fig: 4.2.1.4]

**[Fig: 4.2.1.4] Maintain Resource Request**

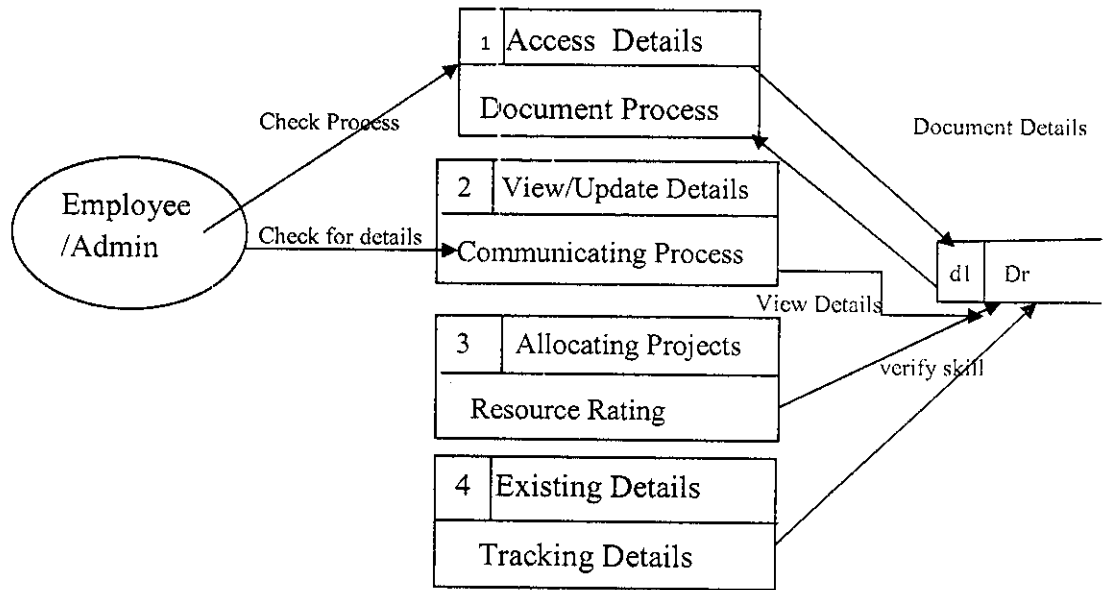

Tracker is the main advantage of the portal as all the details can be tracked, all the information uploaded are stored as the documents can be retrieved by any internal user, the projects completed, existing, and the new projects are also stored to track the details, the administrator maintains the system to track the history details. It is shown from the following figure [fig: 4.2.1.5]

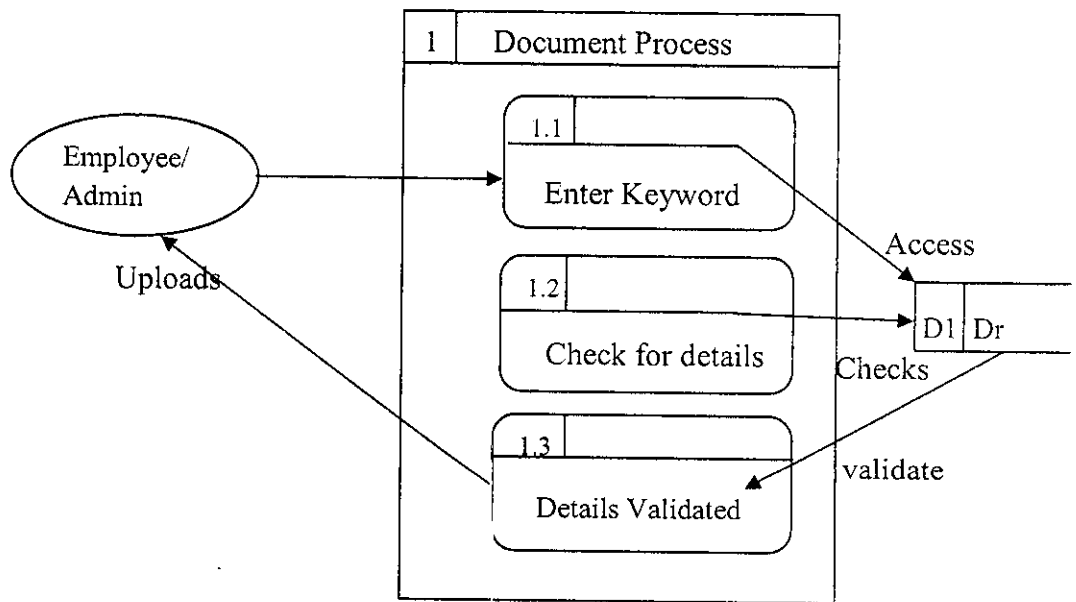

**[Fig: 4.2.1.5] Tracking Data**

The intranet portal maintains a knowledge sharing as any type of the user in the finance business unit can access the system

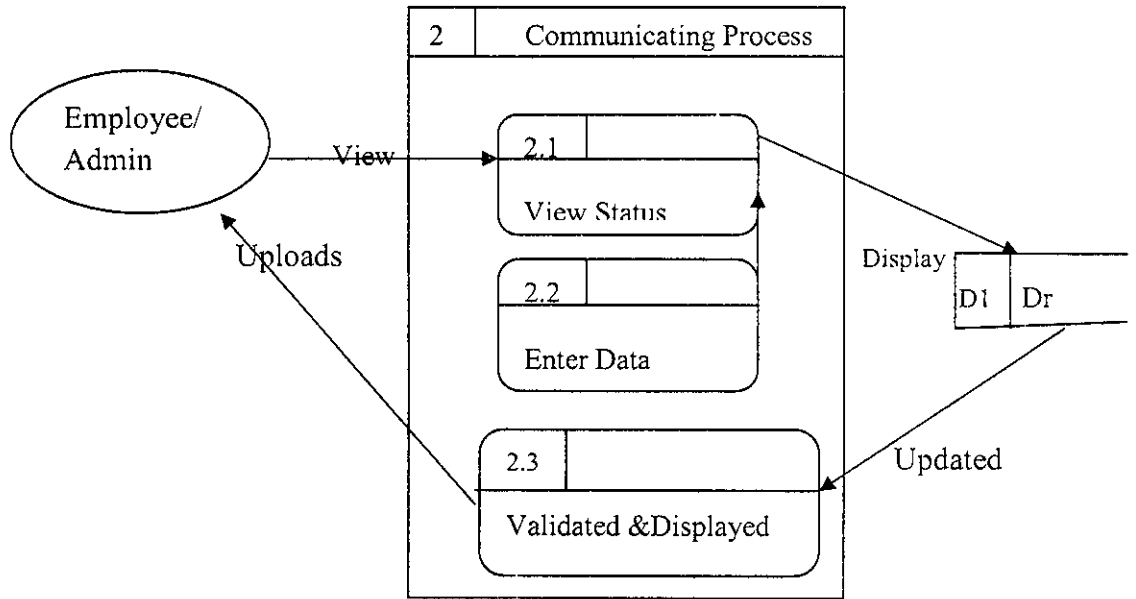

### 4.2.2 Data Flow Diagram

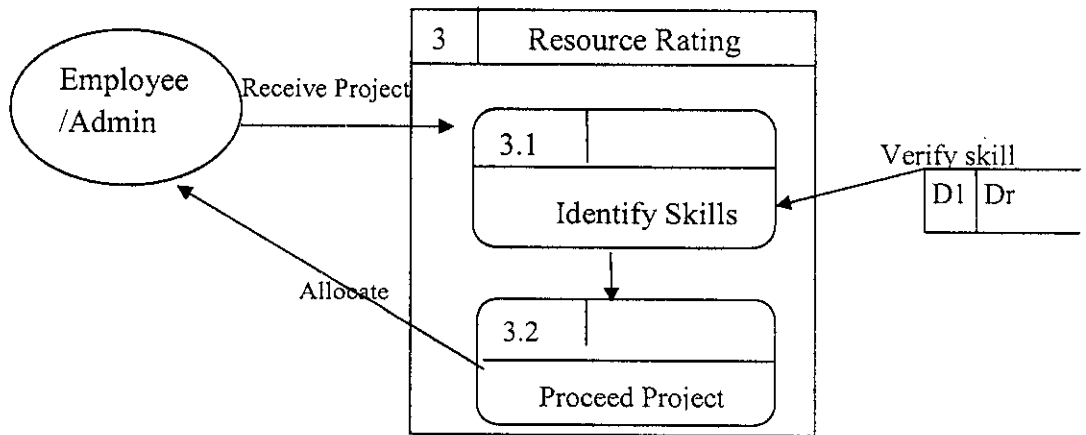

[Fig: 4.2.2.1] Patni COE Portal

[Fig: 4.2.2.2] Upload and Access Details

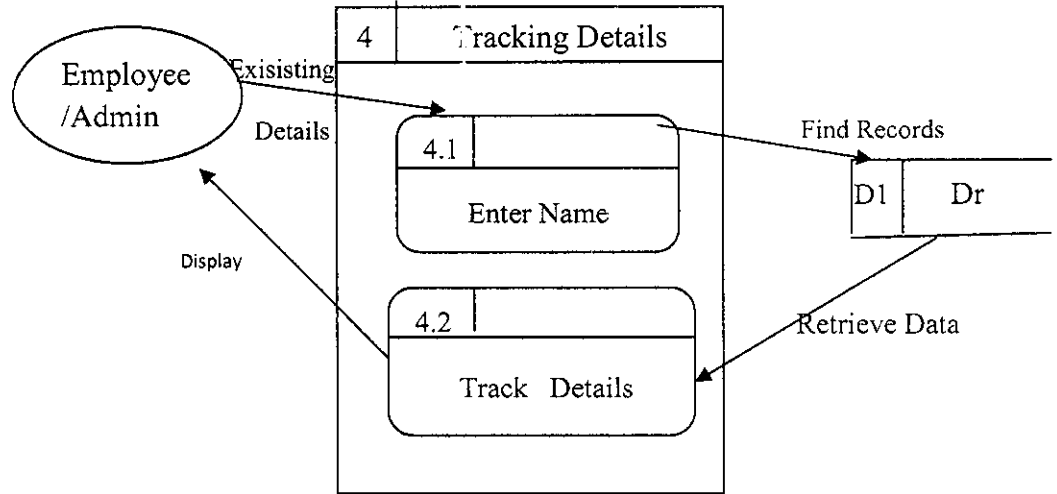

[Fig: 4.2.2.3] Maintain Communication Details

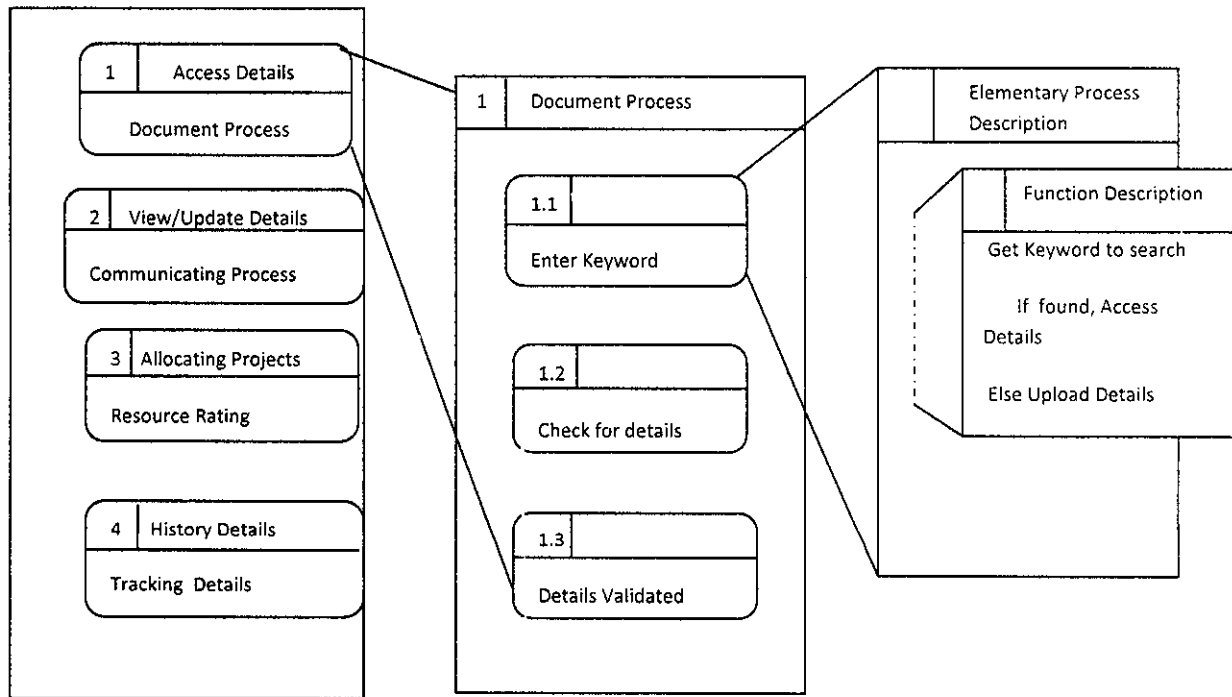

[Fig: 2.2.2.4] Resource Rating

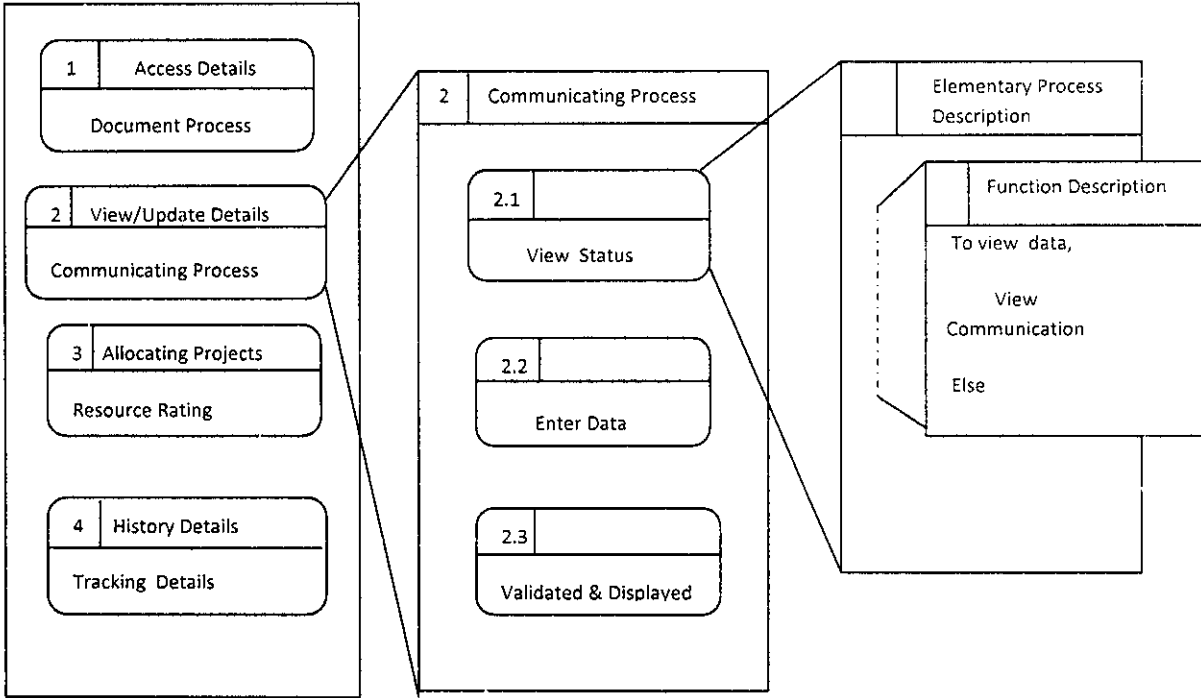

[Fig: 2.2.2.5] Tracking History Details

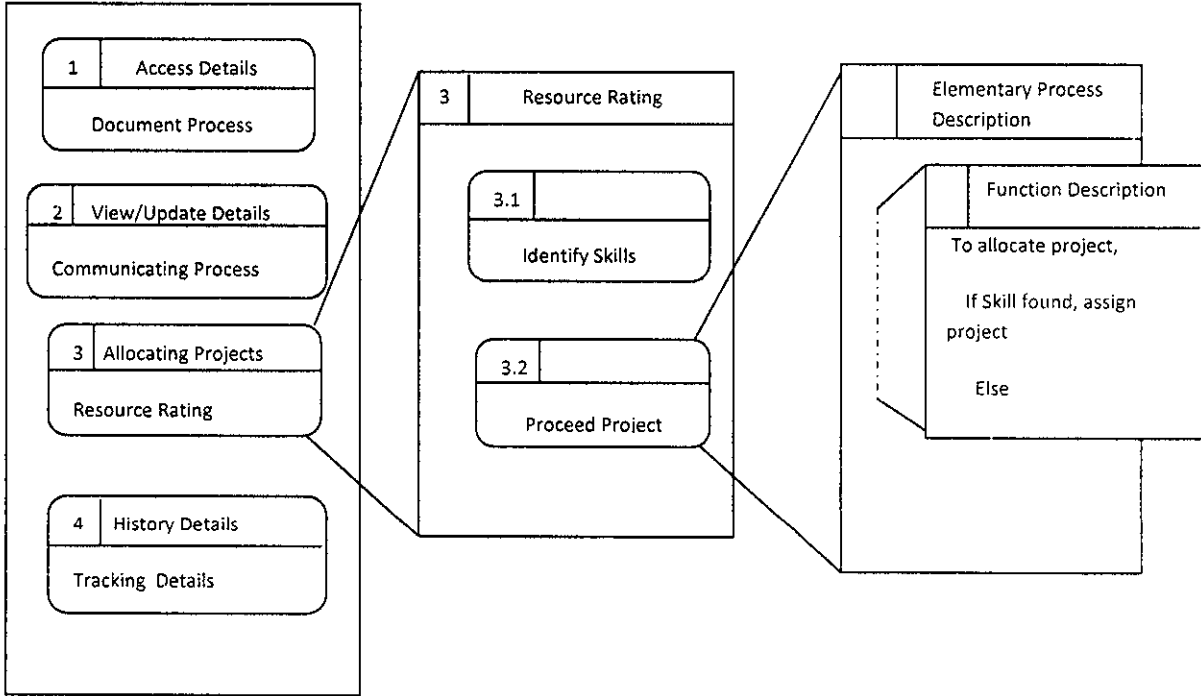

[Fig: 2.2.2.6]

**Resource Rating**

[Fig: 2.2.2.9] ELEMENTARY PROCESS DESCRIPTION:

**Track Existing Details**

# CHAPTER 5

## ARCHITECTURAL DETAILS

### 5.1 n –tier Architecture

Many elements need to be considered when deciding on the architecture of the application, such as performance, scalability and future development issues

An n-Tier application usually has three tiers, and they are called the presentation tier, the business tier and the data tier. Let's have a look at what each tier is responsible for.

#### **Business Tier**

Business Tier is the layer responsible for accessing the data tier to retrieve, modify and delete data to and from the data tier and send the results to the presentation tier. This layer is also responsible for processing the data retrieved and sent to the presentation layer.

In ASP.NET it includes using SqlClient or OleDb objects to retrieve, update and delete data from SQL Server or Access databases, and also passing the data retrieved to the presentation layer in a DataReader or DataSet object, or a custom collection object. It might also include the sending of just an integer, but the integer would have been calculated using the data in the data tier such as the number of records a table has.

#### **BLL and DAL**

This layer is divided into two sub layers: the Business Logic Layer (BLL), and the Data Access Layers (DAL). Business Logic Layers are above Data Access Layers, meaning BLL uses DAL classes and objects. DAL is responsible for accessing data and forwarding it to BLL.

In ASP.NET the project will be using SqlClient to retrieve the data and sending it to BLL in the form of a Dataset or Data Reader. BLL is responsible for preparing or processing the data retrieved and sends it to the presentation layer.

In ASP.NET, it might be using the Dataset and Data Reader objects to fill up a custom collection or process it to come up with a value, and then sending it to Presentation Layer. BLL sometimes works as just transparent layer. For example, if you want to pass a DataSet or Data Reader object directly to the presentation layer.

### **Data Tier**

Data tier is the database or the source of the data itself. Often in .NET it's an SQL Server or Access database, however it's not limited to just those. It could also be Oracle, mySQL or even XML. The Project Patni COE Portal will focus on SQL Server, as it has been proven to be the fastest database within a .NET Application.

# CHAPTER 6

## TESTING

The classical strategy for testing computer software begins with “testing in the small” and works outward toward “testing in large”. So we begin with unit testing, then progress towards integration testing, and culminate with validation and system testing

### 6.1 Unit Testing

Unit testing focuses verification effort on the smallest unit of software design, software component or module, each and every form in the project is nothing but a class, each class is a smallest unit and we are testing all the classes like base class, child class, friend class etc..

All forms like knowledge management, communication center, resource request, and history tracking are tested individually for their source code correctness and perfection

### 6.2 Integration Testing

Integration testing tests the process of integrating the various modules to form the completed system. When we are intending to integrate all the modules together to get a complete project, we will face some integration errors ie. Problem interconnecting with other modules

To find and recover those integration errors and to get an error free project, the project is undergoing the integration testing .we are integrating all the modules in the knowledge management, patni section, communication center, resource request with the issuing authority module which forms the project as a complete system

### 6.3 System Testing

System testing is actually a series of different tests whose primary purpose is to fully exercise the computer based system. Although each test has a different purpose, all work to verify that system has been properly integrated and perform allocated functions

Patni COE portal is tested in variety of ways to know whether there is a failure of software and what the way to recover it is. Also, it is tested for its security and protection mechanisms built into proper and powerful to protect the system from improper penetration

Finally, the software is tested for its run-time performance within the context of an integrated system

### 6.4 Test Case Reports

<i>S. No</i>	<i>Test Case name</i>	<i>Test Procedure</i>	<i>Pre condition</i>	<i>Expected Result</i>	<i>Results</i>
1	Emp Id	If input field is blank	Null	Emp id is given with a limit of 8 digits	Passed
2	Keyword	if input field is blank	Null	Required field validator validates the id	Passed
3	Communication details	if input field is blank	Null	Required field validator validates the id	Passed
4	Login type	Select one location	Null	Required field validator validates the id	Passed

5	Username	if input field is blank	Null	Required field validator validates the id	Passed
6	Recognition Type	Select one location	Null	Required field validator validates the id	Passed
7	Password	if input field is blank	Null	Required field validator validates the id	Passed
8	URL	Browse the location	Null	Required field validator validates the id	Passed
9	Communication description	if input field is blank	Null	Required field validator validates the id	Passed
10	Date	if input field is blank	Null	Required field validator validates the id	Passed

# CHAPTER 7

## PERFORMANCE AND LIMITATIONS

### 7.1 Merits of the System

The system benefits the users to access any type of the information and helps in sharing the knowledge among the users of the portal. The advantage of the system is

- Performance
- Maintenance
- Scalability
- Site Feature
- Personalization and customization

The maintenance of the system helps the users to retrieve any details from the portal. This intranet portal enables the FSBU users to update and download any type of information

### 7.2 Limitations of the System

The patni COE portal helps to retrieve all the details from the portal but the system is limited to some features

- Communication information are uploaded by the Administrator
- Access of portal features is limited to internal users
- Intranet portal is limited to FSBU users

The contributor can upload their details but cannot upload any type of communication as the feature will not be available to the users. Only the administrator has the complete rights to make any changes to the intranet portal

### **7.3 Future Enhancements**

The future enhancement of the system is

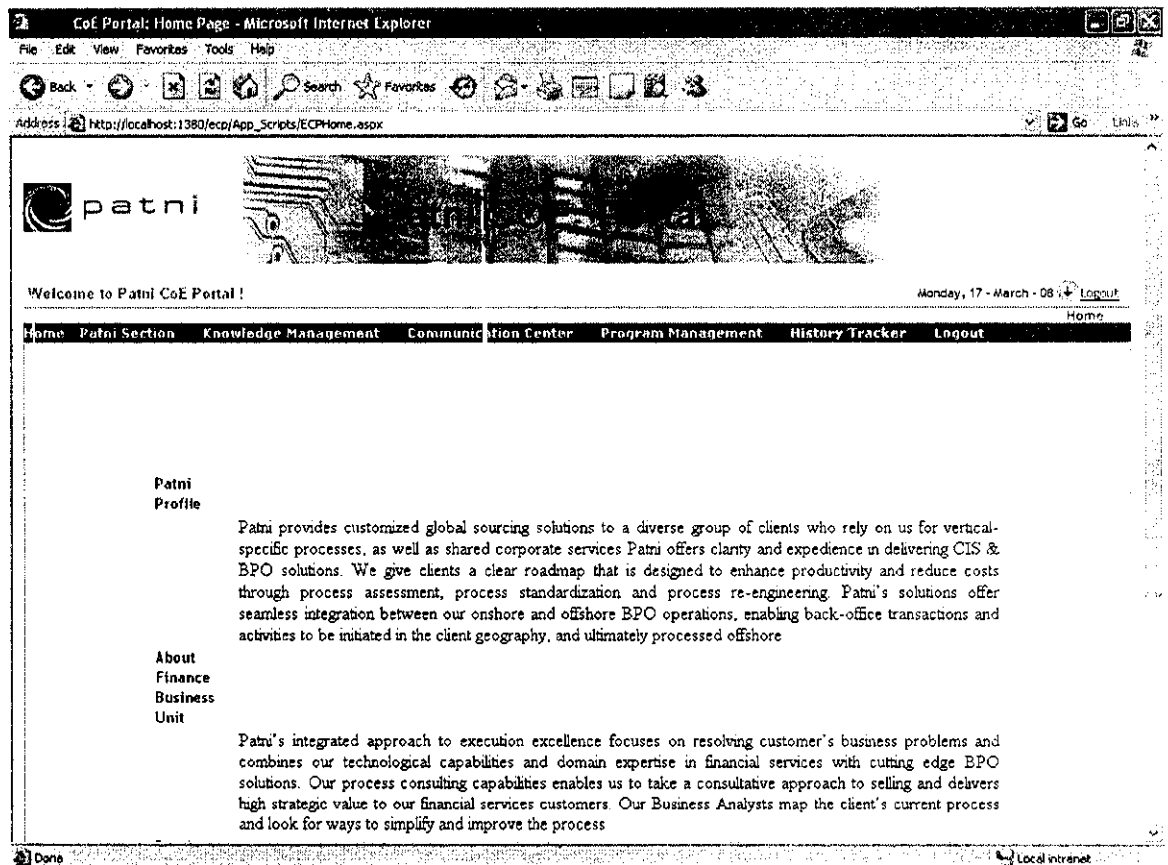

- ✓ To enhance the whole details of the employee including in the portal permanent employee, temporary employee, increment of the salary
- ✓ To display the employee details and the project details in the form of graphical form
- ✓ To include this COE portal in the patni intranet portal

# CHAPTER 8

## APPENDICES

### 8.1 Sample Screens

The users are either logged as admin or an internal user. After the portal gets logged, it displays the home page as follows:

The portal displays all the modules as the home or the first page of the portal. Home page displays the patni profile and about the Finance Business Unit

## Patni Section

This module is divided into sub modules as each sub module displays its features as follows:

The screenshot displays the Patni CoE Portal interface. At the top, there is a navigation bar with the following links: Home, Patni Section, Knowledge Management, Communication Center, Program Management, History Tracker, and Logout. The main content area is titled 'Welcome to Patni CoE Portal!' and includes a 'Logout' link. The page content is organized into several sections:

- Introduction to Patni:** This section provides an overview of Patni's services, stating that they offer customized global sourcing solutions to a diverse range of clients who rely on them for vertical-specific processes, as well as shared corporate services. It highlights Patni's expertise in delivering CIS & BPO solutions, emphasizing a clear roadmap designed to enhance productivity and reduce costs through process assessment, standardization, and re-engineering. It also mentions seamless integration between onshore and offshore BPO operations.
- About Finance Business Unit:** This section focuses on Patni's integrated approach to execution excellence, which aims to resolve customer business problems by combining technological capabilities and domain expertise in financial services. It notes that their process consulting capabilities enable them to take a consultative approach to selling and delivering high strategic value to financial services customers. The text also mentions that Patni has successfully set up several offshore programs for their clients within the Financial Services space, demonstrating 30-40% savings and significant improvement in service quality.
- Patni Service Offerings:** This section lists the various services offered by Patni, though the specific details are partially obscured by a scroll bar.

The browser's status bar at the bottom indicates the page is on a 'Local Intranet'.

The Portal enables all the sub modules, patni introduction can be viewed completely

## Maintain Portal

The information is maintained by the administrator as the admin has the rights to upload or make any changes, it is shown as follows:

The screenshot shows a web browser window titled "CoE Portal: Eagle Information Listing - Microsoft Internet Explorer". The address bar shows the URL: `http://localhost:1380/ECP/App_Scripts/UserServices/ECP/EagleInterface/ListEagleInfoPage.aspx`. The page content includes a "patni" logo, a navigation menu with items like "Home", "Patni Section", "Knowledge Management", "Communication Center", "Program Management", "History Tracker", and "Logout". A table titled "Patni Information Details" is displayed, listing section names, types, and statuses. Below the table is a "New Intro Line" button. The footer of the page reads "Patni Internal Site - Copyright © Patni Computer Systems Ltd.".

Section Name	Section Type	Section Status
<a href="#">Patni Introduction</a>	IMAGE	INACTIVE
<a href="#">Patni Profile</a>	TEXT	ACTIVE
<a href="#">About Finance &amp; Business Unit</a>	TEXT	ACTIVE
<a href="#">Patni Service Offerings</a>	TEXT	ACTIVE

[New Intro Line](#)

If section names are clicked, modification or new information can be added, if new introduction line is clicked, information can be added.

New information can be added to display in the home page, All the details for the patni section can be added in the maintain patni information section as follows:

The screenshot shows a web browser window titled "CoE Portal: Eagle Introduction Maintenance" with the Microsoft Internet Explorer interface. The address bar shows the URL: [http://localhost:1380/ECP/App\\_Scripts/UserServices/ECPEagleInterface/MainEagleIntroForm.aspx?intIntroSectionId=0](http://localhost:1380/ECP/App_Scripts/UserServices/ECPEagleInterface/MainEagleIntroForm.aspx?intIntroSectionId=0). The page header includes the "patni" logo and a navigation menu with items: Home, Patni Section, Knowledge Management, Communication Center, Program Management, History Tracker, and Logout. The main content area is titled "patni Introduction Maintenance" and contains a form for "Maintain Patni Information". The form fields are: "Section Name[\*]:" (text input), "Section Description[\*]:" (text area), "Section Type[\*]:" (radio buttons for TEXT and IMAGE), "Section Status[\*]:" (radio buttons for ACTIVE and INACTIVE), and "Update Date:" (text input). At the bottom of the form are "Create" and "Go Back" buttons. The browser status bar at the bottom shows the URL: [http://localhost:1380/ECP/App\\_Scripts/UserServices/ECPEagleInterface/EditEagleInfoPage.aspx](http://localhost:1380/ECP/App_Scripts/UserServices/ECPEagleInterface/EditEagleInfoPage.aspx) and "Local intranet".

All the details are entered through this portal and the section type can be given either as text or image and the status can be either can be active or inactive

## Knowledge Management

This module is divided into upload and search process as both the administrator and the internal user can upload and search documents, it is shown as follows

CoE Portal: Search Contents - Microsoft Internet Explorer

File Edit View Favorites Tools Help

Back Search Favorites

Address http://localhost:1380/ECP/App\_Scripts/UserServices/ECPK/Interface/SearchContentPage.aspx

## Document Upload

All the user details are uploaded into the portal and keyword is given for easy search of the documents, the documents are added as shown in the below screen shot:

The screenshot shows a web browser window titled "CoE Portal: Maintain Contents - Microsoft Internet Explorer". The address bar shows the URL: [http://localhost:1380/ECF/App\\_Scripts/JsServices/ECPKMInterface/MaintContentsForm.aspx?printContentId=0](http://localhost:1380/ECF/App_Scripts/JsServices/ECPKMInterface/MaintContentsForm.aspx?printContentId=0). The page content includes a navigation menu with items like "Home", "Patni Section", "Knowledge Management", "Communication Center", "Program Management", "History Tracker", and "Logout". The main content area is titled "Contents Maintenance" and contains the following form fields:

- Contributor Details:**
  - First Name[\*]:
  - Middle Name:
  - Last Name[\*]:
  - Email:
  - Phone:
- Content Details:**
  - Document Name[\*]:
  - Format:
  - Version:
  - Category[\*]:
- Search Details:**
  - Description:
  - Keywords[\*]:
  - URL[\*]:
- Overwrite If Exists:**  Yes  No
- 

The browser's status bar at the bottom shows the URL: [http://localhost:1360/ECF/App\\_Scripts/JsServices/ECPKMInterface/ListContentsPage.aspx](http://localhost:1360/ECF/App_Scripts/JsServices/ECPKMInterface/ListContentsPage.aspx) and "Local intranet".

The URL is given to be browsed from the local host which are share by the internal users

## Maintain Communication

The communication can be viewed through this portal, all the communication details are entered by the administrator from the following screen shot given below:

The screenshot shows a web browser window titled "CoE Portal: Communications Maintenance - Microsoft Internet Explorer". The address bar shows the URL: `http://localhost:1380/EC/App_Scripts/UserServices/ECCommunicationInterface/MaintCommunicationsForm.aspx?intCommunicationId=0`. The page content includes a navigation menu with items like "Home", "Patni Section", "Knowledge Management", "Communication Center", "Program Management", "History Tracker", and "Logout". The main content area is titled "Patni Communication Details" and contains a form with the following fields:

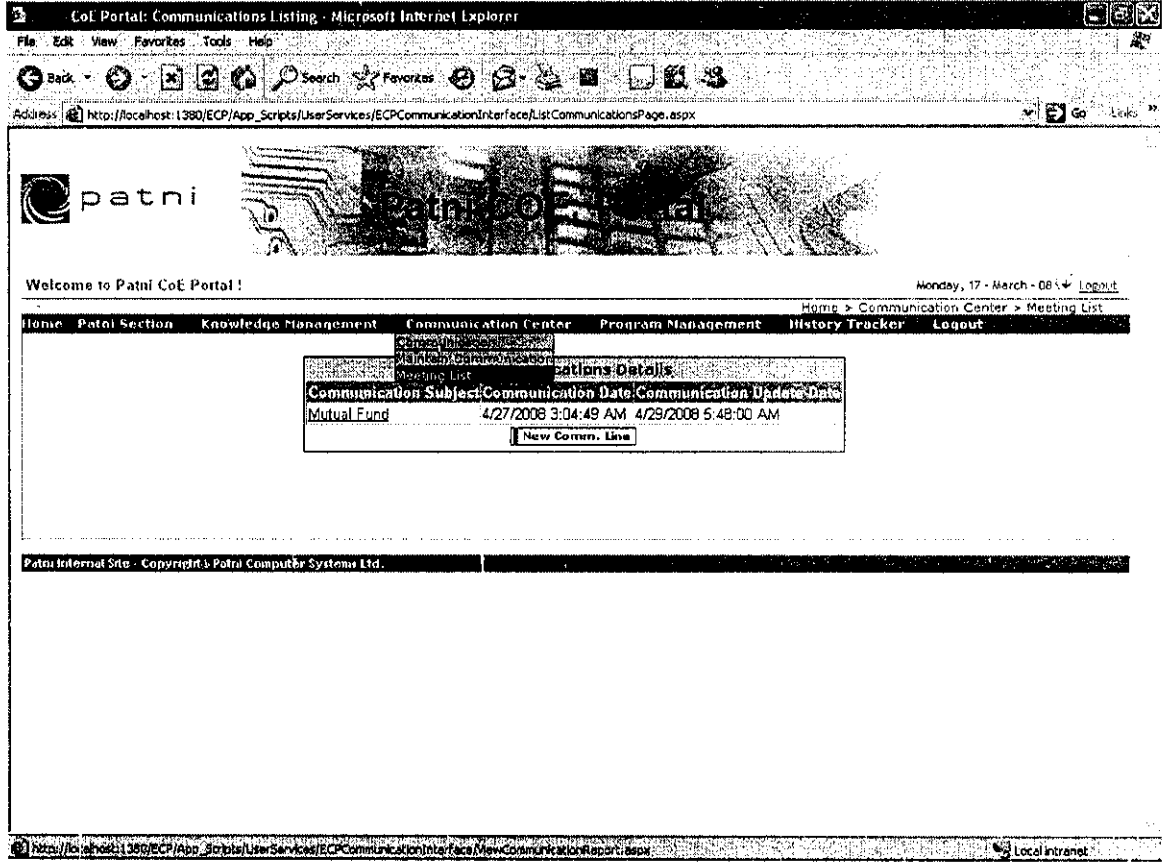

- Communication Subject[\*]:** A text input field.
- Communication Details[\*]:** A large text area for detailed information.
- Communication Desc[\*]:** A text input field for a description.
- Communication Date:** A date selection field.
- Update Date:** A date selection field.

At the bottom of the form, there are two buttons: "Create" and "Go Back". The browser's status bar at the bottom shows the URL: `http://localhost:1380/EC/App_Scripts/UserServices/ECCommunicationInterface/strCommunicationPage.aspx` and "Local Intranet".

All the details are entered using this communication maintenance page, the details given are the subject, description and the dates are automatically updated and the create button is given to create the communication

# Meeting List

All the communication details are displayed in the portal , the meetings are listed as below:

If the communication subject is clicked, it displays the description as the details, time and date of the meeting to be held

## Resource Request

The request details are entered with skill set, resources, request by date, need by date are created as show below:

The screenshot shows a web browser window titled 'Maintain Program - Microsoft Internet Explorer'. The address bar shows the URL: `http://localhost:1380/ECP/App_Scripts/UserServices/ECPProgramInterface/MaintProgramForm.aspx`. The page header includes the Patni logo and the text 'Welcome to Patni CoE Portal!'. A navigation menu contains: Home, Patni Section, Knowledge Management, Communication Center, Program Management, History Tracker, and Logout. The main content area is titled 'Program Maintenance' and contains a form with the following fields:

- WD No. [\*]:
- WD Date [\*]:
- Skills Set [\*]:
- Request Desc. [\*]:
- No. of Resources [\*]:
- Request Date [\*]:
- Need by Date [\*]:
- Closure Date:
- Update Date:

At the bottom of the form are two buttons: 'Create' and 'Go Back'.

Each field are entered and the create is clicked to enter a new record to be stored in the database, and the details are displayed in the portal

The details are displayed in the portal as each user can view the details from the below screen shot:

The screenshot shows a web browser window displaying the Patni CoE Portal. The page title is "CoE Portal: Program Listing - Microsoft Internet Explorer". The address bar shows the URL: "http://localhost:1380/ECP/App\_Scripts/UserServices/ECPProgramInterface/ListProgramPage.aspx". The page features a navigation menu with links: Home, Patni Section, Knowledge Management, Communication Center, Program Management, History Tracker, and Logout. The main content area displays a table titled "Program Listing" with the following data:

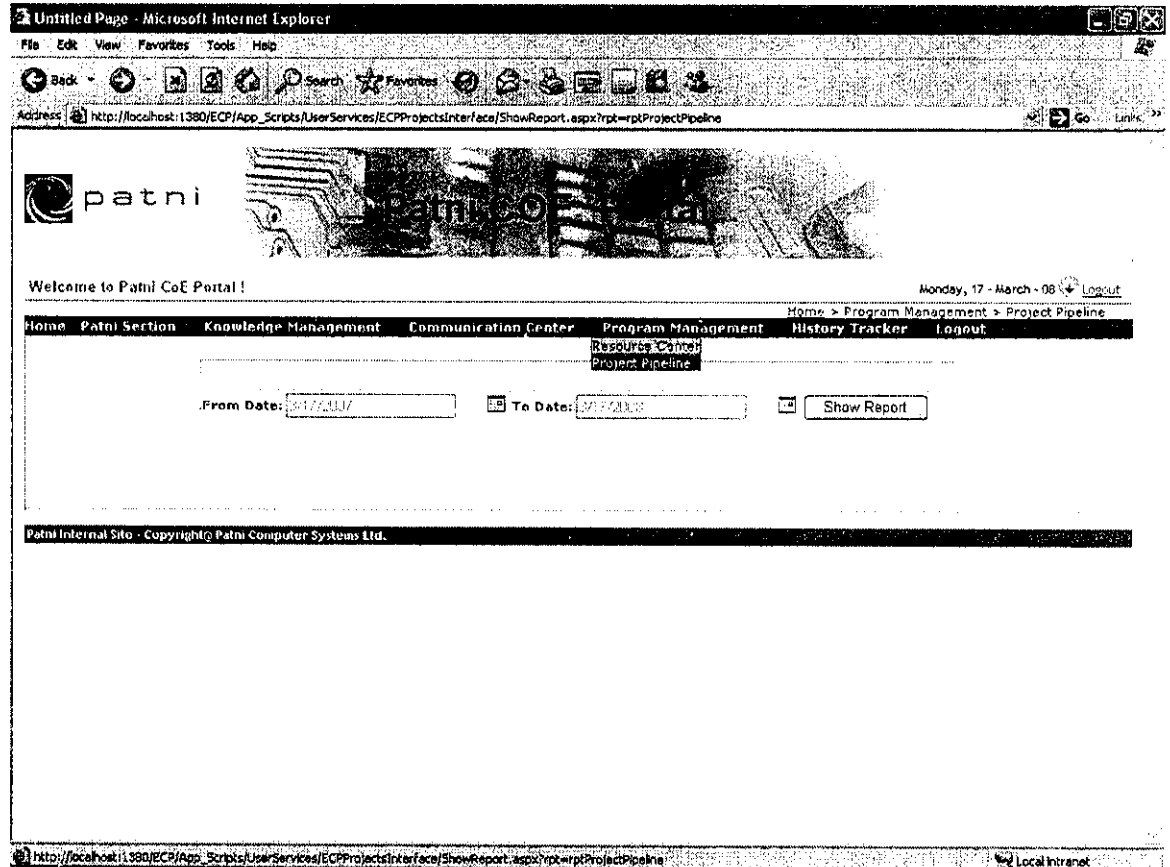

WO No.	User Name	WO Date	No. of Resources	Request Date	Need by Date	Closure Date	Skill Set	Request Description	Update Date
PN SOW	Abhay Walimbe	07/17/2007	1	07/02/2007	07/17/2008	07/20/2008	VB, .NET, SQL Server	As a replacement of Prashant Nagmoli	07/17/2007
PN SOW	Daurang Thakker	08/20/2007	4	08/29/2007	08/31/2008		Crystal Report, Advance Reporting	Strong Knowledge of Crystal Rpt	08/29/2007

Below the table, there is a button labeled "New Resource Request". At the bottom of the page, the footer text reads: "Patni Internal Site - Copyright © Patni Computer Systems Ltd." The browser status bar at the bottom shows the URL and "Local intranet".

The no of resources gives the number of users allocated to complete a particular project. All the details are displayed and the Project manager can see the skill set and allocate the projects

## Project Pipeline

The project pipeline enables the user to view the number of projects completed, existing projects and the newly allocated projects from the below screen shot

The projects can be found out using the from date and to date. To know the completed projects or existing projects, the dates are selected and show report is clicked to view the project details

## History Tracker

The tracker maintains the user details, project details, and recognition is maintained and also the user's password can also be changed ,it is listed as follows:

Portal User Details								
Name	Employee Id	Email	Office Phone	Home Phone	Mobile	Location	Role	Login Type/ Acct. Status
Tejashri Kundale	14823	Tejashri.Kundale@patni.com	02239173698	1		OFFSHORE	PM	MANAGER ACTIVE

## 9.2 Tables

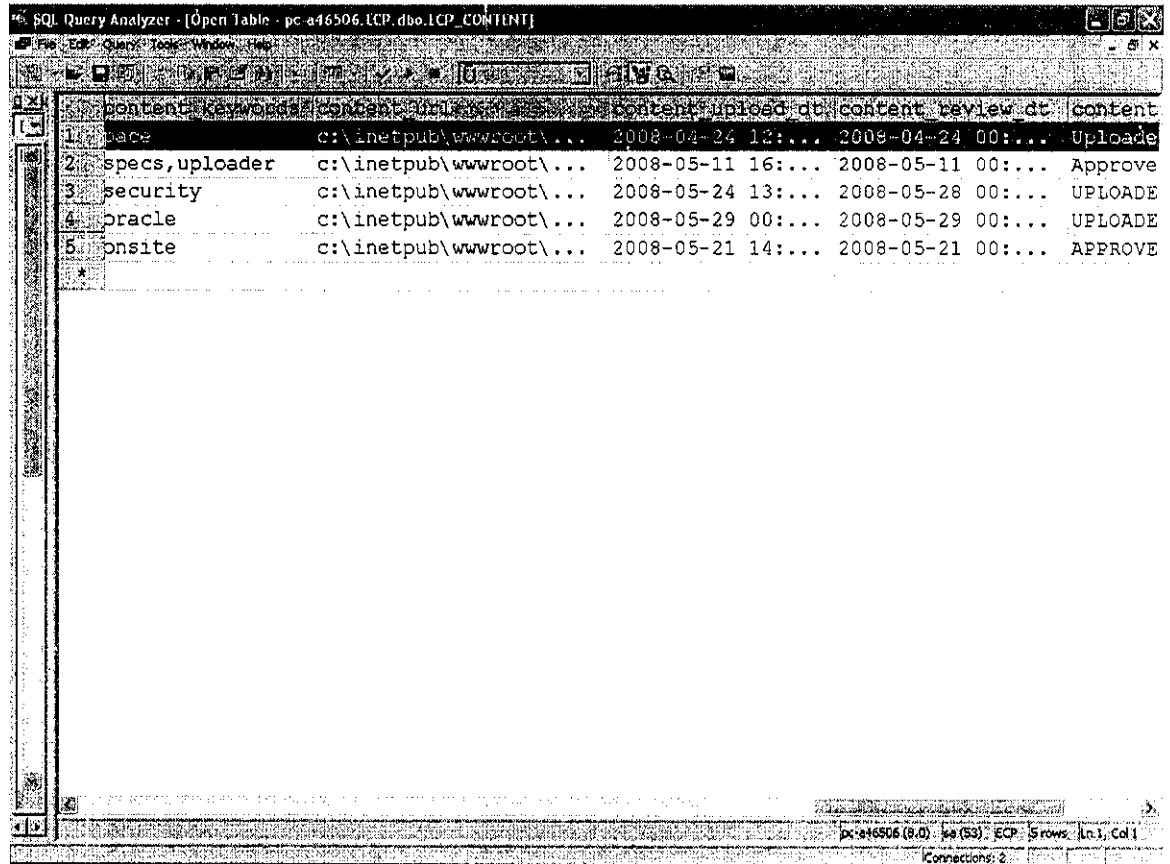

The tables display the data stored in the database, the content details are displayed as follows:

	content_id	content	contrib_fname	content_contrib_fname	content_contrib_lname	content_contrib_lname
1	133	abhi	Na	Na	Na	abhi.k
2	134	Mahurya	Na	Na	Na	Madhur
3	135	Tejashri	Na	Na	Na	tejash
4	136	Ajay	Na	Na	Na	ajay.k
5	169	Anil	Na	Na	Na	anil.l

Each value are validated by the id, the content table displays the content details stored in the database

Each document are given with a meaningful keyword for easy search ,the url stored in the local host enables the users to download the document as the systems are shared, the content details with keyword, dates are displayed as follows

	content_keyword	content_url	content_upload_dt	content_review_dt	content

## Maintaining Communication

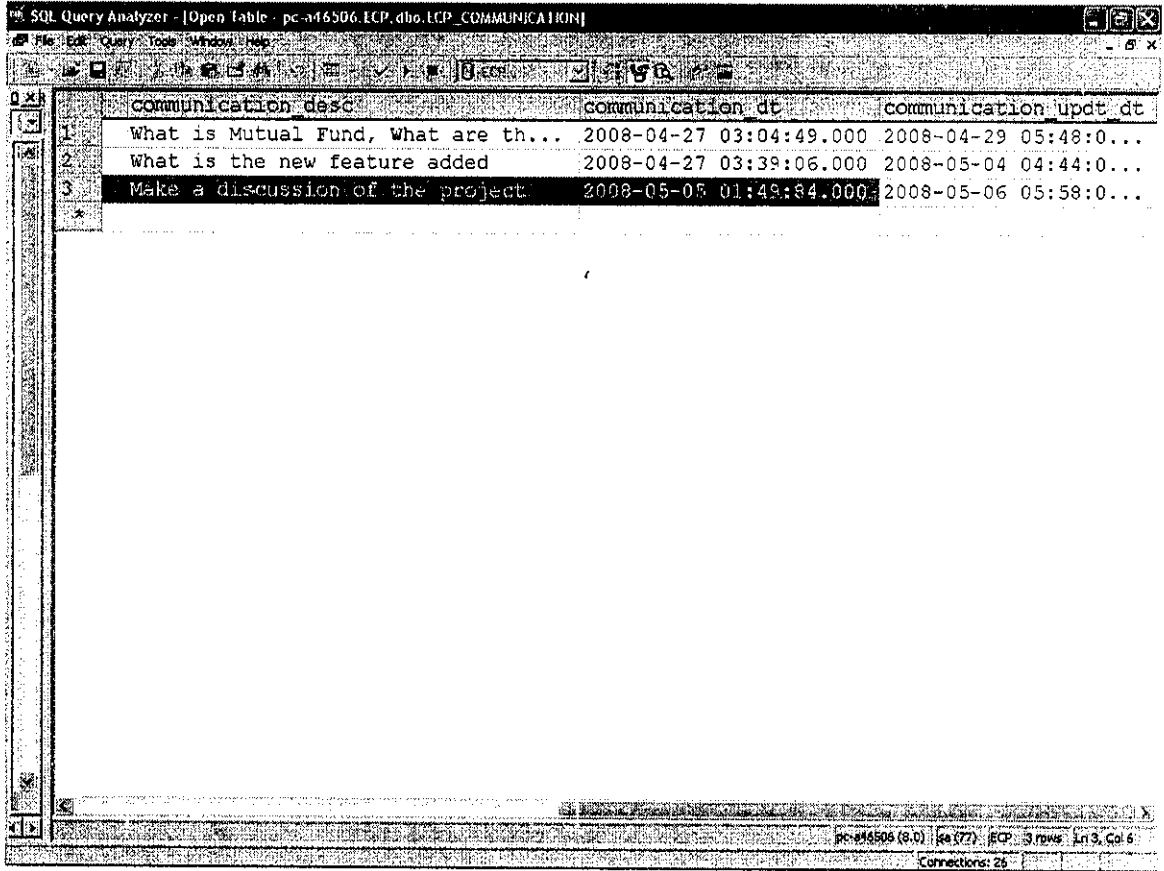

All the communication details are stored in the database, the communication validates through the communication Id and it is displayed in the table as follows:

	communication Id	communication subject	communication details	communicati
1	35	Mutual Fund	What is Mutual Fund	What is Mut
2	36	Pace Meeting	Enhancement features	What is the
3	37	Discussion of Project	New Project	Make a disc
*	NULL			

The user can view all the details from the table

The details for the communication are described with a specified date and the communication can also be modified and the date gets automatically changed in the update field, it is shown in the table as follows:

The screenshot shows a window titled "SQL Query Analyzer - [Open Table - pc-146506.ECP.dbo.LCP\_COMMUNICATION]". The window displays a table with three columns: "communication\_desc", "communication\_dt", and "communication\_updt\_dt". The table contains three rows of data. The first row has a description "What is Mutual Fund, What are th...", a date "2008-04-27 03:04:49.000", and an update date "2008-04-29 05:48:0...". The second row has a description "What is the new feature added", a date "2008-04-27 03:39:06.000", and an update date "2008-05-04 04:44:0...". The third row has a description "Make a discussion of the project", a date "2008-05-05 01:49:34.000", and an update date "2008-05-06 05:58:0...". The status bar at the bottom indicates "pc-146506 (8.0) [sa (77) - ECP - 3 rows] Ln 3, Col 6" and "Connections: 26".

## Resource Management

All the resource details are maintained by the administrator and each detail can be viewed by either the internal user or the administrator, it is shown as follows:

The screenshot shows a SQL Query Analyzer window displaying a table with the following data:

request_id	user_id	request_wo_num	request_wo_date	request_res_cnt	request_req_dt
5	52	PN SOW	2007-07-17 00...	1	2007-07-02 00.
6	67	54844	2007-08-20 00...	4	2007-08-29 00.

The status bar at the bottom of the window indicates: pc-a46506 (9.0); sa(58); ECP; 2 rows; ln 2, Col 8; Connections: 7

Each data are validate by the user Id and the count for the resources are also maintained

The projects starting date and the completion date are also stored to find out the status of the project, closing date of the project, skill set of the employee are also stored to retrieve the status of the project

The tables lists with a details of skill set, project need by date, update date and the closure date as follows:
