

**B.TECH DEGREE EXAMINATIONS: NOV/DEC 2022**

(Regulation 2018)

Third Semester

**TEXTILE TECHNOLOGY**

U18EII3203: Measurements and Instrumentation

**COURSE OUTCOMES**

- CO1:** Understand the parameters used for measurement in textile industry  
**CO2:** Identify the various transducers used for various applications  
**CO3:** Understand about how the feature extraction using image analysis in textile processing  
**CO4:** Apply the criteria to choose appropriate sensors for specific applications  
**CO5:** Utilize and apply the control components for textile processing applications

**Time: Three Hours**

**Maximum Marks: 100**

**Answer all the Questions:-**

**PART A (10 x 2 = 20 Marks)**

**(Answer not more than 40 words)**

- |  |     |                   |
|--|-----|-------------------|
| 1. Recall the standards used in the textile applications.                          | CO1 | [K <sub>1</sub> ] |
| 2. List the units of pressure used in the industrial applications.                 | CO1 | [K <sub>1</sub> ] |
| 3. Represent the Principle of operation strain gauges.                             | CO2 | [K <sub>2</sub> ] |
| 4. Compare the working principle and applications of RTD and Thermocouple sensors. | CO2 | [K <sub>4</sub> ] |
| 5. Identify the applications of image processing in textile processing.            | CO3 | [K <sub>2</sub> ] |
| 6. Identify the Pre-processing techniques used in the digital image processing.    | CO3 | [K <sub>1</sub> ] |
| 7. Differentiate accuracy and precision.   | CO4 | [K <sub>2</sub> ] |
| 8. Justify cathode ray oscilloscope can be used for frequency measurement.         | CO4 | [K <sub>4</sub> ] |
| 9. Identify a closed loop system is used in textile applications.                  | CO5 | [K <sub>2</sub> ] |
| 10. Classify the programming methods used in the PLC.                              | CO5 | [K <sub>4</sub> ] |

**Answer any FIVE Questions:-**

**PART B (5 x 16 = 80 Marks)**

**(Answer not more than 400 words)**

- |  |   |     |                   |
|--|---|-----|-------------------|
| 11. a) Explain the types of standards that are involved in measurement in textile applications                         | 8 | CO1 | [K <sub>2</sub> ] |
| b) Discuss in detail the different methods of calibrations of physical parameters used in the industrial applications. | 8 | CO1 | [K <sub>2</sub> ] |

- |     |    |  |    |     |                   |
|-----|----|--|----|-----|-------------------|
| 12. | a) | Classify the transducers based on the working principles, transduction outputs and applications .                                    | 6  | CO2 | [K <sub>4</sub> ] |
|     | b) | Exemplify the resistive transducers used in to measure temperature and pressure in textile applications.                             | 10 | CO2 | [K <sub>3</sub> ] |
| 13. |    | Discuss in brief about the construction and working of Cathode ray oscilloscope for measuring the signals with proper block diagram. | 16 | CO4 | [K <sub>2</sub> ] |
| 14. |    | Elucidate in detail about any application of the image analysis technique for textile identification.                                | 16 | CO3 | [K <sub>3</sub> ] |
| 15. |    | Describe the general block diagram of open loop and closed loop feedback control system with an appropriate examples                 | 16 | CO5 | [K <sub>2</sub> ] |
| 16. |    | Explain in detail about the architecture of programmable logic controller used in textile industries with neat sketch.               | 16 | CO5 | [K <sub>2</sub> ] |
