

**B.E/B.TECH DEGREE EXAMINATIONS: APRIL / MAY 2023**

(Regulation 2018)

Fourth Semester

**TEXTILE TECHNOLOGY**

U18TXI4202 : Fabric Manufacture -II

**COURSE OUTCOMES**

- CO1:** Discuss the concept of shuttle less loom and its evaluation.  
**CO2:** Discuss the concept and mechanism of shuttle less weaving machine.  
**CO3:** Discover the nonwoven technology.  
**CO4:** Describe the various nonwoven web laying and web bonding systems.

**Time: Three Hours**

**Maximum Marks: 100**

**Answer all the Questions:-**

**PART A (10 x 2 = 20 Marks)**

**(Answer not more than 40 words)**

- |  |     |                   |
|--|-----|-------------------|
| 1. Recall the limitations of shuttle looms.                              | CO1 | [K <sub>1</sub> ] |
| 2. Infer the nonwoven web laying principle.                              | CO1 | [K <sub>2</sub> ] |
| 3. Show the features of torsion bar picking mechanism.                   | CO2 | [K <sub>1</sub> ] |
| 4. Identify the difference between tip and loop transfer in Rapier loom. | CO2 | [K <sub>3</sub> ] |
| 5. List the importance of profile reed.                                  | CO2 | [K <sub>1</sub> ] |
| 6. Relate the water quality parameters with for water jet looms.         | CO2 | [K <sub>2</sub> ] |
| 7. Recall the web formation system with examples.                        | CO3 | [K <sub>2</sub> ] |
| 8. Identify the raw material requirements for spun bonding process.      | CO3 | [K <sub>1</sub> ] |
| 9. Show the structure of needle used in Needle Punching process.         | CO4 | [K <sub>2</sub> ] |
| 10. Infer the thermal bonding principle with suitable example.           | CO4 | [K <sub>2</sub> ] |

**Answer any FIVE Questions:-**

**PART B (5 x 16 = 80 Marks)**

**(Answer not more than 400 words)**

- |   |    |     |                   |
|---|----|-----|-------------------|
| 11. a) Compare the woven, knitted and nonwoven fabric formation methods.            | 6  | CO1 | [K <sub>3</sub> ] |
| b) Illustrate the formation of unconventional selvages in shuttleless loom process. | 10 | CO1 | [K <sub>3</sub> ] |
| 12. a) Analyze the weft insertion cycle in rapier loom with a neat sketch.          | 8  | CO2 | [K <sub>4</sub> ] |
| b) Outline the weft insertion cycle in projectile loom with a neat sketch.          | 8  | CO2 | [K <sub>2</sub> ] |

- |     |    |   |    |     |                   |
|-----|----|---|----|-----|-------------------|
| 13. | a) | Describe the principle and operation of air jet weaving machines with neat diagram.                   | 8  | CO3 | [K <sub>3</sub> ] |
|     | b) | Explain the principle and operation of circular weaving machines with neat diagram.                   | 8  | CO3 | [K <sub>2</sub> ] |
| 14. | a) | Outline the principle and procedure for dry laid carded web formation with neat sketch.               | 8  | CO4 | [K <sub>2</sub> ] |
|     | b) | With neat sketch explain the principle and procedure for polymer laid web formation.                  | 8  | CO4 | [K <sub>2</sub> ] |
| 15. | a) | With neat sketch, explain the principle and operation of Hydro entanglement nonwoven bonding process. | 8  | CO5 | [K <sub>2</sub> ] |
|     | b) | Explain the principle and operation of chemical bonding nonwoven process with neat sketch.            | 8  | CO5 | [K <sub>2</sub> ] |
| 16. | a) | Explain the principle and method of Air laid web formation technique.                                 | 10 | CO4 | [K <sub>2</sub> ] |
|     | b) | Summarize the properties and applications of Air laid nonwoven fabrics.                               | 6  | CO4 | [K <sub>2</sub> ] |
